An **Examiner's Amendment** to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leanne Price on March 17, 2005.

Examiner's Amendments to the Claims:

Claims 12, 90 and 99 have been amended as follows:

12. (Currently amended) A recombinant gelatin composition consisting essentially of recombinant human gelatin polypeptides of a uniform molecular weight.

90. (Currently amended) A pharmaceutical composition comprising a recombinant gelatin and a pharmaceutically acceptable excipient, wherein the recombinant gelatin consists of recombinant human gelatin polypeptides of a uniform molecular weight.

99. (Currently amended) A recombinant gelatin consisting of recombinant human gelatin polypeptides of a uniform molecular weight.

The following is an **Examiner's Statement of Reasons for Allowance**: The following reference appears to be the closest art to the claimed invention. Werten *et al.* (Yeast 15, 1087-1096 (February 1999)) teach a recombinant non-hydroxylated gelatins based on mouse type I and rat type III collagen, however, the reference does not teach a recombinant human gelatin or a recombinant hydroxylated gelatin. A provisional obviousness type double patenting rejection made to co-pending application 10/232,175 (filed August 30, 2002), which is filed after the filing date of instant application (filed November 10, 2000), is withdrawn in view of no other rejections remained (see MPEP 804 IB). Therefore, the claims are allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
